

and if there is anything here
~~that~~ I can look for for you
I shall be happy to do so.
I need scarcely say that I
trust you will not pass
this way without giving
me a call.

I am,
Dear Sir,
yours truly,
George Lawson Ph.D.

Prof. of Chemistry & Nat. Hist.
University of Queen's College, Kingston,
Ca.

College Street, Kingston, Ca.

24 Oct. 1859.

Dear Sir, On leaving England I was
requested by my friend Dr. Lindsay
to be the bearer of a few pam-
phlets for you. I hoped ere now
to have had an opportunity of
delivering them in person; but
as I am not now likely to be
in your neighbourhood this
season, I send them by post, with
this explanation of the delay.
I have added a few papers of my
own, & beg your acceptance of
them.

In the preface to your "Manual"
it is mentioned that sets of
Hepes, Sullivan's & Lesquerens's

Musci & Hepaticae are to be had. I am desirous of obtaining a set, and, if you will excuse the trouble, I shall ask you to request the person who takes charge of the sale of the sets to forward one to my address, embracing as many species as can be supplied, as well as the more remarkable varieties and forms. The package might be sent to care of Messrs J. F. Lohme & Co., 556 Broadway, N.Y., with instructions to inclose with the next goods they send to me. I should also be glad to hear of any other good sets of plants for sale by

Collectors in the States. I have been anxious to obtain copies of Tuckermann's two little books on Lichens, but the booksellers in New York through whom I applied knew nothing of them. I suppose they are out of print? Has not a set of Lichens (Specimens) been also issued by Tuckermann?

I fear I am giving you a great deal of trouble; but I hope you will enable me to repay it in some way. If there are still any blanks in your British collections, it will afford me great pleasure to supply them as far as in my power;
